WHAT WE DO ▶▶▶▶

At AL-JAWHARA PRINTING PRESS, we offer a complete range of services in the fields of Print & Packaging complemented by a wide variety of finishes that help us spoil our Clients with choices for them to pick from.

OFFSET PRINTING

We specialize in offset printing of books, magazines, Calendars & all Marketing Collaterals. Our state of the art infrastructure produces high quality printing all under one roof.

UV EFFECTS DIGITAL PRINTING

Customised UV treatments such as Spot, Raise & Drop Off UV, Metalised, Blauie, Gold or any other color of Foiling without the use of Dye or blocks.

DIGITAL PRINTING

We have invested in the HP Indigo which allows clients to see the potential in the digital technology, guaranteeing closest match to an Offset Printing. We exclusively prepare our entire line up of dummies/samples ensuring 100% accuracy prior to production.

PACKAGING

Our equipped team of Design experts help to derive innovative concepts for packaging for all line of Products to ensure your design is impactful and is ultimately usable to your target audience.

RIGID BOX PACKAGING

Our team is constantly keeping up with market trends, and coming up with new inventive and exciting ideas in Rigid Box Packaging. We are not content to keep producing existing designs but constantly try to push the envelope in the design industry.

PHOTO ALBUM

Photo Books are the perfect way to create a stunning keepsake of those joyous occasions to capture special moments. We at Hira print specialise in High Quality Prints with the additional touch of Custom UV treatment to highlight the valuable moments in the picture.

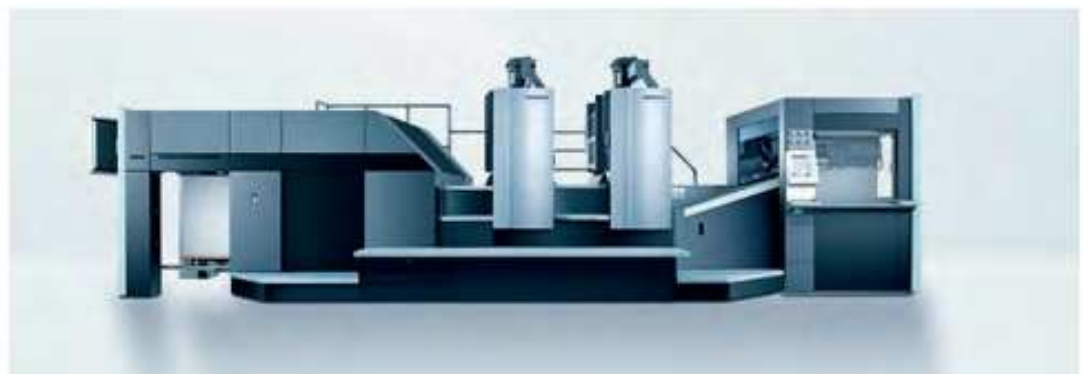

As one of the country's leading creative printing companies AL-JAWHARA PRESS innovation, quality, service and investments in the latest technology have seen it grow from a humble start-up in 1990 to a thriving industry leader holding a strong customer base of leading household names of the country. with around 32 years in the industry, we believe that AL-JAWHARA PRESS difference is unique! Quality, service and value, even in a changing economic and ecological environment continue to ensure our success. We want highly satisfied customers to enjoy the difference we can bring to their business and look forward to share success long into the future.

Technology:

With whatever short time we have been in business of printing, we have pioneered in bringing new technologies to the market. From colour digital printing machines to the **UV presses** and robotized finishing equipment that could handle a range of speciality substrates such as **Met-PET, plastics, lenticular 3D**, etc., We have always brought technology to the market that helps our customers differentiate their product from their competition .Some of our latest technologies are featured below:

The Pre- Press set up... HEIDELBERG SPEEDMASTER

STATION : 2 COLOR

Substrates : Paper & Paper Board

AL-JAWHARA for Brand Owners

- 1. Ensure consistent consumer experience** - Ensure consistent consumer experience through best quality error free printing
- 2. Build a single source of truth** - Ensure to follow specific Brand guidelines basis which, build a single source of trust.
- 3. Guarantee compliance** - Make sure that your packaging & marketing assets comply with all applicable regulations.
- 4. Boost time to market** - Boost time to market and gain market share. Identify bottlenecks with increased visibility.
- 5. Get it first time right** - Use approval with automated workflow to get all materials first time right within a single, traceable system for both internal and external stakeholders.

AL-JAWHARA for Designers

- 1. Packaging design** - Studio is a unique set of tools for 3D packaging design made specifically for packaging artwork professionals.
- 2. Virtual prototyping** - Add the finishing touch to your packaging designs with Studio Visualizer. Its patented dynamic print visualization can show a wide range of substrates, printing and finishing effects in real-time.
- 3. Virtual retail environment** - See your new designs on the shelf next to the competition; present a complete product launch in 3D, including retail-ready packaging, displays and other branded items. Test the visual impact of your latest product package design in the environment where it all happens: the store.

AL-JAWHARA for Printers and Converters

- 1. Multiple Process Treatments** - We offer complete flexibility with multi process print capabilities across multiple substrates
- 2. Printing Capabilities** - We can print according to different systems such as 4 color Process, 6 color Process & Pantone Shades.
- 3. Mock ups & Substrates** - We can create proofs and mock ups across different substrates such as Gold/Silver Foiling, Shrink wraps/Labels, Cartons, MDF Boards, Cardboards etc.
- 4. Turn around Time** - Once we receive the artwork, we can process, proof and deliver the mock up within 24 to 48 hours.

WHO WE ARE

AL-JAWHARA.PRESS Studio is a full fledged Graphic Design studio working across Offline & Online Media Graphics. We are specialists at what we do and focus primarily on User Experience. Our key objective is to create a design that is appealing and most importantly usable to the target audience.

We offer our clients solutions starting with ideation & creation of **Product Packaging Design/Structural Displays/POS/Prototypes/Mock-Ups** on the actual substrate, virtual stores, and 3 Dimensional PDFs right up to the actual printing of collaterals and large format prints. It is a journey that spans from Concept Ideation to manufacturing the Final Product with no fixed MOQs. Our state of the art facility can accommodate all volumes to out deliver within the set timelines.

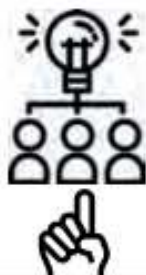

HOW WE DO IT

Concept & Research

The details of basic sketches around your product idea, to be aware what is your product and how is your product going to be used? It is vital to explore the market trends and determine how you need to find out what is already on the market what is unique to your product vision? There is a better product how is yours going to be better?

STEP
01

Design & Development

Using the information you have gathered from your research you can now develop your product design. This is the time to create your design with precision and technical expertise so when you prepare to the final step, you have a detailed design and ready to go to the next step.

STEP
02

Prototype/Sampling

Using our expertise in design, we develop a prototype sampling that is ready to be used to create your product. This is the time where we can create a prototype that is ready to be used to create your product.

STEP
03

Final Production

Once the design is complete, we develop a prototype sampling that is ready to be used to create your product. This is the time where we can create a prototype that is ready to be used to create your product.
